Education

Goa College of Engineering

Bachelor of Engineering in Information Technology

June. 2019 – July 2023

Goa, India

Experience

Ciklum

August 2023 – Present

Software Engineer — ASP.NET Core, NextJS, ReactJS

Pune, Maharashtra

- Automated a manual order fulfillment system for a major American financial institution by building a ReactJS front end and .NET Core WebAPI backend, deployed on AWS with Docker and CI/CD pipelines — reducing order processing time.
- Completely migrated and developed company's legacy website in Next.js, resulting in a 30% improvement in page load times and significant SEO gains (higher search rankings and increased organic traffic).
- Developed multiple software solutions — including desktop apps, web portals, and background services for a client specializing in radiation detection systems, using the .NET ecosystem, improving operational efficiency and enabling better real-time data handling.

Teknorix Systems Pvt. Ltd

August 2022 – October 2022

Full-Stack Developer Intern — ASP.NET Core, ReactJS

Verna, Goa

- Developed backend integrations mimicking Google Meet's API and implemented Zoom API functionality for the company's job interview automation portal; presented the solution to the CEO and CTO, demonstrating potential for internal tool enhancement and client-facing features.
- Built a web application using ReactJS to replace manual cafeteria order tracking (previously managed through WhatsApp and messaging groups), resulting in streamlined operations and improved order accuracy.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

Projects

Lexia — Immersive Language Learning Companion | NextJS, Postgres, Tailwindcss, GeminiAPI

May 2025

- Developed a smart web application to learn languages powered by GeminiAI.
- Written in NextJS 15, Prisma(postgresql), AuthJS and Paddle(payments).
- Deployed the application to vercel cloud and published open-source container image to GH Packages.

Yeet-code | NextJS15, ExpressJS, Postgres, Redis/BullMQ

June 2025

- Created a playful coding platform for unserious programmers. A question bank with multiple programming questions; users can write, compile, and submit code against test cases and get results.
- Created multiple service and a worker that spun up isolated code-runner containers asynchronously.
- Created Github Actions pipelines and deployed the applications to AWS and Vercel.

Technical Skills

Languages: C#, JavaScript, Typescript, SQL

Frontend: ReactJs, NextJS, Tailwindcss, Razorpages

Backend: ASP.NET Core WebAPI, ExpressJS/NodeJS

Developer Tools: VS/VS Code, Git, Docker, GeminiAI

Others: UnitTesting(xUnit, RTL, Jest), AWS, Github Actions

Leadership / Extracurricular

- Achieved Team of the Quarter Award Q2 2024.
